-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kawaguchi et al. in view of Bekheet, and vice versa. Kawaguchi et al. disclose an air conditioning compressor having vent holes 71 and blades 70 in the rotary wheel (pulley) 5 for cooling the compressor. The compressor may have an electromagnetic clutch provided between the pulley and the rotary shaft (col. 10, ll. 19 to 21). However, Kawaguchi et al. do not disclose the details of the electromagnetic clutch. Bekheet discloses an automobile air conditioning compressor having a main body 10, a fixed sleeve 44, a connecting shaft 12, a circular electromagnet 46, a rotary wheel 42, a bearing 40 and a co-moving disk 28. However, Bekheet does not disclose that the rotary wheel is formed with vent holes and blades for providing cooling air for the compressor. In view of the teaching of Kawaguchi et al. that an electromagnetic clutch may be provided between the pulley and the rotary shaft, and in view of the structural similarity of the pulley 5 of Kawaguchi et al. and the pulley 42 of Bekheet, it would have been obvious to use an electromagnetic clutch as shown by Bekheet between the pulley and rotary shaft of Kawaguchi et al. It would also have been obvious to modify the pulley 5 of Bekheet by increasing the diameter of disk 36 in order to accommodate vent holes and blades for cooling the compressor, as taught by Kawaguchi et al.

Conclusion

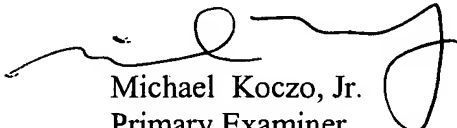

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
